Key insight

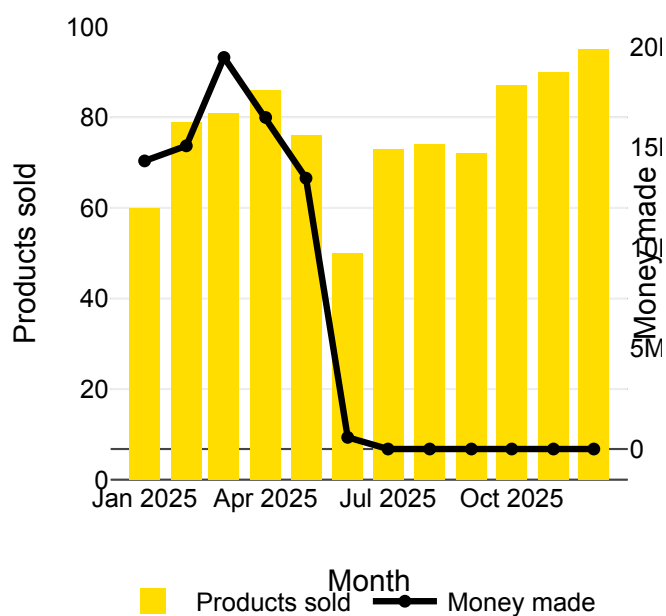

Spark is currently the strongest product by units sold, with 268 units sold, followed closely by JET PRO with 262 units. Together, these two products make

up more than half of all products sold, showing that Salpha's most popular products are driving the highest customer activity.

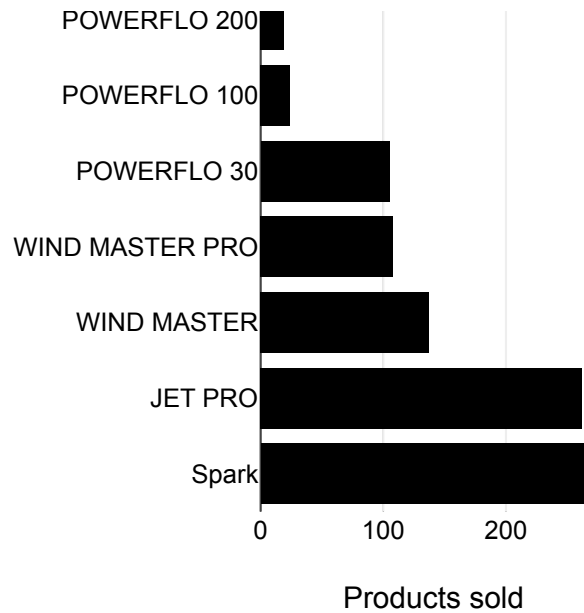

However, POWERFLO 200 tells a different story. It sold only 19 units, making it one of the lower-selling products by quantity, but it generated ₦23,400,000.00, which makes it the strongest product by money made. This means POWERFLO 200 should not be treated as a weak product just because it sells less often.

Overall, the dashboard shows two important product groups: Spark and JET PRO are fast-moving products that may need regular restocking, while POWERFLO 200 and POWERFLO 30 are high-value products that need careful tracking because each sale has a much bigger financial impact.
